

Press Release

EmpXtrack chosen as a Leading SaaS offering in the area of Human Resource Management

August 13, 2008. NOIDA (India)

DARE, India's top magazine for entrepreneurs (Vol 2 Issue 11 Aug 08), has recognized EmpXtrack - Human Capital and Talent Management Software as one of the 15 SaaS (software-as-a-service) solutions that can help organizations reduce their IT costs.

Author Krishna Kumar, Group Editor with CyberMedia (India), in the magazine's cover story "15 Services to keep your IT costs down" identified 15 business functions (like CRM, sales management, human resources management, market research surveys etc.) where application of SaaS software can help organizations to bring down the cost of IT services. Prominent SaaS services that were covered in this article include Salesforce.com, Google Analytics, SAP, [EmpXtrack and others](#).

He cites many advantages of SaaS technology and says, "SaaS takes away your investments, which in most cases can be fairly heavy, and converts that into smaller monthly payouts that would be easier to organize and manage. As your business scales up, (or God forbid, down), you can change your usage slab and payouts, mostly instantaneously. There is no lead time to buy and install new systems nor are there any associated capital costs. Finally, you are free to concentrate on your business and not on how to get a particular software or hardware working;"

Under human resources management category, EmpXtrack emerged as a leader of SaaS technology amongst other players in its domain. "EmpXtrack from Saigun offers HRMS, Applicant Tracking, Employee Self Services (leave tracking, HR help desk, employee handbook, personal data update), Employee Portal and Appraisal as a managed package. [Pricing](#) is on slabs of number of employees."

About Saigun Technologies and EmpXtrack
